Election of Species

Commissioner of patent and trademarks  
Washington D.C. 20231

Dear Sir:

In response to office action mailed September 2, 2004, please note applicant wishes to elect the species shown in Figures 1-9 for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held allowable.

The basic structure of the invention is described within the first embodiment. The rest of the embodiments primarily describe different ways of adjustment and pivot attachment in more detail.

It is the applicant's opinion that the three independent claims 1,5, and 13 are generic and cover all of the embodiments described in the application. Many of the dependent claims are believed to be generic as well.

Respectfully Submitted,

  
Kevin Tissue  
Applicant pro se
